

**SOUTH #5 RSA LIMITED PARTNERSHIP
d/b/a
BRAZOS CELLULAR COMMUNICATIONS, LTD.**

E911 REPORT

MAY 1, 2007

The following information is submitted in accordance with FCC directive:

1. The number and status of Phase II requests from Public Safety Answering Points

Within the wireless service area of South #5 RSA Limited Partnership d/b/a Brazos Cellular Communications, Ltd. ("Brazos Cellular"), there are a total of three Public Safety Answering Points ("PSAPs"). All three are receiving and processing Phase I E911 data. Brazos Cellular fulfilled all of the PSAPs' requests for Phase I services in a timely manner. Optimization for delivery of Phase II data will be conducted when the PSAPs request Phase II services. No such requests have been received by Brazos Cellular to date.

2. The dates on which Phase II service will be available to PSAPs served by Brazos Cellular's wireless network

Brazos Cellular stands ready to timely honor requests for Phase II services as they are received from PSAPs.

3. The status of coordination efforts with PSAPs for alternative 95% handset penetration dates

Brazos Cellular has informed the PSAPs that it has reached the 95% benchmark. Regarding E911 matters, Lonnie Rue, Assistant Manager of Brazos Cellular, maintains communication with Nortex Regional Planning Commission, representing the PSAP in Young County, and with the West Central Texas Council of Governments, representing the PSAPS in Stephens County and Throckmorton County.

4. Efforts to encourage customers to upgrade to location-capable handsets

Brazos Cellular maintains its policy of selling and activating only location-capable digital handsets. It continues to promote the CDMA network facilities and to conduct marketing campaigns to encourage consumer adoption of new handsets. Ads have targeted TDMA and analog customers with free minutes, free phones and other special offers on the trade-in of their old handsets for location capable handsets. Promotions for phones with cameras, ringtones, color screens and other features are intended to entice customers into upgrading their handsets. Advertising campaigns advertise the safety and coverage advantages of the CDMA system. Special offers are disseminated by direct mail, bill inserts, website and newspaper and radio/tv ads.

5. The percentage of customers with location-capable phones

At this time approximately 97.66% of Brazos Cellular's subscribers are using Phase II location-capable handsets.

6. Status in achieving compliance and whether Brazos Cellular is on schedule to meet its revised 2/28/07 deadline

Brazos Cellular met the goal of a 95% rate of penetration for location capable handsets by February 28, 2007, on which date a rate of 96.98% was measured. On January 24, 2007 Brazos Cellular had submitted to the FCC a request for further limited waiver and extension of time to achieve the 95% penetration benchmark, past the earlier appointed deadline of January 31, 2007. On March 1, 2007 Brazos Cellular submitted to the FCC a supplement reporting that the 95% benchmark had been achieved. On March 9, 2007 the FCC released an *Order* in CC Docket No. 94-102, FCC 07-1217, granting Brazos Cellular, *nunc pro tunc*, an additional waiver and limited extension of the deadline to February 28, 2007.
